2017-2018 Governor's Project: "Service in Sync"

"Service in Sync" is a 6-part all age mentorship program targeted at uniting the community through service. The main focus of this project is to connect face-to-face with other members of the community in a meaningful way.

Every 2 months the focus of the project shifts in age range. However, simply because the age changes, doesn't mean that a club cannot complete a project with any of the other age ranges. The ages of the months are simply *recommendations* of focus, and not the only ages that can be helped within those months. So, if you were working on a community garden in June/July with your K-kids (or children ages 6-11), that would count, but a project with Young Children Priority One (ages 0-5) completed in those months would still be applicable under this Governor's Project. So, I hope you all can "Sync up in Service" with your local CKIs and SLPs.
